EXPERIMENT 8: Configuring User Management and Role-Based Access Control (RBAC) in a Zoho Creator Application

Aim

To study and configure user management and Role-Based Access Control (RBAC) in Zoho Creator to provide secure access to the Loan Application Management System based on different user roles.

SCREENSHOTS:

Observation

Zoho Creator allows administrators to manage users and assign role-based permissions. Different roles, such as Administrator, Loan Officer, and Applicant, can be assigned appropriate access to loan application forms, reports, and records. This helps protect sensitive applicant information and prevents unauthorized modifications.

Result

Thus, user management and Role-Based Access Control (RBAC) were studied for the Loan Application Management System to understand secure and role-specific access management.
